

API Get Drop Points

Description

- This API provides the list of available drop points.
- Base URL - APIKEY: Will be provided for different environments.
- The customer prints the label without sending the drop point ID. Then, the courier will scan that label when the package arrives.

GET URL: /api/v1/droppoints

Header

- **APIKEY:** APIKEY

Example query params

```
?Latitude=23.8469335&Longitude=37.9565762&MaxDistanceMeters=1000&CourierCode=979317&Page=1&
Latitude:23.8469335
Longitude:37.9565762
MaxDistanceMeters:1000
CourierCode:979317
Page:1
PageSize:1
```

Example response

```

}

```

Query params format

Order	Parameter	Type	Mandatory	Default Value	Description
1	Latitude	Double	NO	N/A	Latitude (-90 <= latitude <= 90)
2	Longitude	Double	NO	N/A	Longitude (-180 <= longitude <= 180)
3	MaxDistance	Number	NO	1000 (if the location are sent)	Specifies the maximum distance, in meters, from the given location to display the available drop points
4	CourierCode	String	NO	N/A	Courier code
5	Page Number	Number	YES	1	Number of result pages

Order	Parameter	Type	Mandatory	Default Value	Description
6	PageSize	Number	YES	500	Maximum number of results per page
7	Active	Boolean	NO	N/A	Active DropPoint
8	AllowReturns	Boolean	NO	N/A	DropPoint allow returns
9	TypeId	Number	NO	N/A	1 = DropPoint, 2 = Locker

Response format

Parameter	Type	Description
totalItems	Number	Number of total items obtained by filters
id	String	Drop Point id
name	String	Drop Point name
courierCode	String	Courier code
longitude	Double	Longitude (-180 < = longitude < = 180)
latitude	Double	Latitude (-90 < = latitude < = 90)
typeId	Number	Drop Point type (1 = Drop Point, 2 = Locker)
type	String	Drop Point type description (Drop Point, Locker)
streetName	String	Drop Point Street name
city	String	Drop Point city
postalCode	String	Drop Point postal code
country	String	Drop Point country
active	Boolean	Available Drop Point
allowReturns	Boolean	Enabled for the return module
workingHours	Array	Available Drop Point working hours

Pre Manifest

Description

- This Endpoint provides tools to be called by ITX with POST method. It has a simple header authorization. To use these endpoint, the IP's of the caller must be on a White list. (Please provide the IP addresses ITX will use to call).
 - This endpoint is responsible for returning the necessary labels to print based on your request.
 - The request must be in array format.
- The difference from the one already implemented is that INDITEX must include the drop point ID in the field named 'drop point'.

POST URL: <https://itxlabels.alas-courier.com:9091/api/itxpremanifest>

Header

- APIKEY: APIKEY

Body Format for Pre Manifest

Order	Parameter	Type	Length	Mandatory	Description
1	box_reference	String	33	YES	Inditex Box Reference
2	order_number	String	30	YES	Inditex Order Number
3	itx_code	String	30	YES	Client code of the company that Courier
4	shipping_type	String	5	YES	Shipping type. It comes from master
5	weight_in_grams	String	40	YES	Box weight in grams
6	depth_in_cm	String	5	NO	Length of the package in Centimeters
7	width_in_cm	String	5	NO	Width of the package in Centimeter
8	height_in_cm	String	5	NO	Height of the package in Centimeter
9	departure_datetime	String	44	YES	UTC time: yyyyMMddHH24mmss
10	customer_name	String	60	YES	Delivery client's name
11	customer_lastname	String	60	YES	Delivery client's surname
12	customer_address1	String	50	YES	Delivery client's address 1
13	customer_address2	String	50	YES	Delivery client's address 2
14	customer_town	String	60	YES	Delivery client's town
15	customer_postal_code	String	15	YES	Delivery client's postal code
16	customer_province	String	60	YES	Delivery client's province
17	customer_country_iso	String	5	YES	ISO for delivery client's country
18	phone_number1	String	60	YES	Delivery client's phone number 1
19	phone_number2	String	60	NO	Delivery client's phone number 2
20	email	String	60	YES	Delivery client's e-mail
21	remarks	String	50	NO	Additional information of the address
22	courier_code	String	20	YES	Code for Courier identification in Inditex
23	courier_description	String	100	NO	String for Courier identification in Inditex
24	payment_type	String	5	NO	Payment method. It comes from master
25	total_value	String	40	NO	Total Value
26	amount_to_be_charged	String	40	NO	Amount to be charged in case of POD
27	currency_iso	String	3	NO	ISO Code for currency
28	preferred_language_iso	String	3	NO	ISO Code for the customer language
29	destiny_store_id	String	9	NO	ID for bundle's destiny store
30	drop_point_id	String	30	NO	Drop Point id provided by ALAS

Order	Parameter	Type	Length	Mandatory	Description
31	drop_point_username	String	60	NO	Drop point username
32	defined_delivery_date	String	4	NO	Preferred delivery date
33	defined_delivery_time	String	80	NO	Preferred delivery time range
34	brand	String	50	YES	Brand that the bundle belongs to
35	tracking_number	String	50	YES	Courier Box Reference
36	source_warehouse	String	50	YES	Source warehouse code
37	courier_service	String	50	NO	Courier Service to ship the parcel
38	package_type	String	5	NO	Package Type of the parcel
39	customer_order_number	String	50	YES	Order number given to customer in eCommerce
40	district	String	100	NO	Delivery client's district
41	external_seller_code	String	50	NO	External seller code in case that the order has been sold by platform (TMALL)
42	external_order_number	String	50	NO	Order Number in the External Seller platform in case that the order has been sold by another platform
43	dangerous_goods	Boolean		NO	Flag to indicate if the box has dangerous goods (For Example value: true, false, null)
44	second_life	Boolean		NO	Flag to indicate if the order which belongs this box is requested to Second Life collection (For Example value: true, false, null)
45	origin_location_id	String	50	NO	ID for the origin location of the parcel, it comes from an Inditex master that will be provided to the courier if it's needed
46	free_field1	String	50	NO	Field available, currently unused
47	drop_point_user_phone	String	60	NO	Drop Point User Phone number
48	drop_point_user_email	String	50	NO	Drop Point User e-mail address
49	billing_company_id	Integer	10	NO	Billing reference for the company
50	municipality	String	50	NO	Delivery client's municipality
51	service_type	String	50	NO	N/A
52	free_field2	String	50	NO	Field available, currently unused
53	free_field3	String	50	NO	Field available, currently unused
54	free_field4	String	50	NO	Field available, currently unused
55	free_field5	String	50	NO	Field available, currently unused
56	free_field6	String	50	NO	Field available, currently unused
57	module	Integer		YES	If module is 1 it is last mile, 2 is devo. if the field is empty it is taken as last mile
58	id_bulk	Integer	10	YES	Bulk numeric indicator, this id must be unique for bulk
59	cnpj	String	50	YES	CNPJ
60	audit_cnpj	String	50	YES	AuditCNPJ
61	audit_ie	String	50	YES	AuditIE
62	fiscal_note_key	String	50	YES	FiscalNoteKey

Order	Parameter	Type	Length	Mandatory	Description
63	fiscal_note_serial_number	String	50	YES	FiscalNoteSerialNumber
64	fiscal_note_number	String	50	YES	FiscalNoteNumber
65	fiscal_note_date	String	50	YES	FiscalNoteDate
66	fiscal_note_value	String	50	YES	FiscalNoteValue
67	sender_address	String	30	NO	Sender address description
68	sender_address	String	30	NO	Sender address description
69	sender_address	String	30	NO	Sender address description

Response status

- Status 200
 - Message: “success”.
 - **The answer of the label is in base64**
- Response:

```

- Status 401
 - Unauthorized.
- Status 403
 - forbidden.
- Status 500
 - Internal Server Error, Check the fields structure.

Insert Items

Description

- This API provides tools to be called by the Sender with the POST method. It has a simple header authorization. Added a new module field, detailing items that are for Last Mile or Devos. Once all the items have been manifested, those labels that correspond to this order which were sent in the pre-manifest and do not exist in this call, will be removed and deleted.
- The difference from the one already implemented is that INDITEX must include the drop point ID in the field named 'drop point'.

51	service_type	String	50	NO	N/A
52	free_field2	String	50	NO	Field available, currently unused
53	free_field3	String	50	NO	Field available, currently unused
54	free_field4	String	50	NO	Field available, currently unused
55	free_field5	String	50	NO	Field available, currently unused
56	free_field6	String	50	NO	Field available, currently unused
57	cnpj	String	50	NO	CNPJ
58	audit_cnpj	String	50	NO	AuditCNPJ
59	audit_ie	String	50	NO	AuditIE
60	fiscal_note_key	String	50	NO	FiscalNoteKey
61	fiscal_note_serial	String	50	NO	FiscalNoteSerialNumber
62	fiscal_note_number	String	50	NO	FiscalNoteNumber
63	fiscal_note_date	String	50	NO	FiscalNoteDate
64	fiscal_note_value	String	50	NO	FiscalNoteValue
65	module	Integer		NO	If module is 1 it is last mile, 2 is devo. if the field is empty it is taken as last mile

Insert Return Items

Description

- This API provides tools to be called by the sender with the POST method. It has a simple header authorization. The purpose of this tool is to manifest the return packages (DEVOS) for a pre-designated courier, which must be picked up by the same Courier from the customer's Address defined in the mentioned information. **this endpoint only receives requesters**

in array format.

- The difference from the one already implemented is that INDITEX must include the drop point ID in the field named 'drop point'

POST URL: <https://itx-returns.alas-courier.com:9091/api/itxitems>

Header

- **APIKEY:** APIKEY
